1. Project Overview

1.1 Platform Summary

Field	Detail
Platform Name	ZimFeast
Tagline	Taste the Extraordinary
Business Type	Three-sided food delivery marketplace
Target Market	Zimbabwe — nationwide rollout, starting with Harare
Client / Owner	Tishanyq Digital, Harare, Zimbabwe
Currency	USD (primary), ZiG (Zimbabwe Gold) support planned
Payment Gateway	Paynow — Zimbabwe-specific (EcoCash, OneMoney, InnBucks)
Primary Brand Colors	#F97316 (Orange), #EA580C (Dark Orange), #FFFFFF (White)
Platform Type	Web App + Android Customer App + Android Driver App + Restaurant Dashboard + Admin Panel

1.2 Platform Description

ZimFeast is a food delivery marketplace that connects three primary user types within the Zimbabwean market:

- **Customers** — Browse restaurant menus, place orders, pay via mobile money, track delivery in real time

- **Restaurants** — Receive and manage incoming orders, update menus, track finance and earnings
- **Drivers (Riders)** — Accept delivery jobs, navigate to pickup and drop-off with in-app navigation, track earnings

Additional user types:

- **Admins** — Full platform management, analytics, financial oversight, user moderation
- **Corporate Admins** — Multi-employee company accounts with departmental spending limits

The platform is designed for Zimbabwean internet conditions (Econet, NetOne, Telecel mobile data), optimized for mid-range Android devices, and uses Paynow — Zimbabwe's dominant payment gateway — supporting EcoCash, OneMoney, and InnBucks.

1.3 Key Differentiators

Feature	Description
Zimbabwe-First Payments	Native Paynow integration (EcoCash, OneMoney, InnBucks) — no international card required
FeastVoucher E-Wallet	Built-in digital wallet for instant payments and split-pay
AI Food Recommendations	"Chef Zim" AI assistant suggests dishes based on preferences
Corporate Accounts	Companies can create employee accounts with spending limits
Referral Program	Users earn 15% discount credits for referring new customers
Scheduled Orders	Customers can schedule deliveries for a future date and time
Proof of Delivery	Drivers photograph delivery as proof — visible to customer and admin
WhatsApp Support	Direct WhatsApp integration for customer support (+263 78 160 3382)
In-App Navigation	Drivers get turn-by-turn directions without leaving the app
Sound Alerts	Restaurant dashboard plays audio chimes for new incoming orders
Promotional Banners	Admin-managed campaigns targeting new, returning, or all users
Promo Code System	Percentage or fixed-amount discount codes with expiry and usage limits
Multi-Restaurant Support	Customers can browse and order from any registered restaurant
Dual Payment Modes	Restaurants can accept payments directly or through the platform

2. Brand Identity & Design Guidelines

2.1 Color Palette

Color	Hex Code	Usage
Primary Orange	#F97316	Main CTA buttons, highlights, active states, gradients
Dark Orange	#EA580C	Hover states, pressed states, gradient end

Deep Orange	#C2410C	Strong accents, gradient variant
Secondary Orange	#FB923C	Secondary accents, lighter highlights
Light Orange	#FDBA74	Subtle backgrounds, secondary variants
Background	#F9FAFB	Main screen backgrounds
Surface	#FFFFFF	Cards, modals, panels
Dark Text	#1F2937	Headings and body text
Secondary Text	#6B7280	Subtext, captions
Tertiary Text	#9CA3AF	Placeholders, hints
Divider	#E5E7EB	Card borders, dividers
Error / Alert	#EF4444	Errors, cancellations, warnings
Success	#22C55E	Order confirmed, delivered, online status
Warning	#F59E0B	Pending states, attention needed
Rating Star	#FBBF24	Star ratings
Link Blue	#2563EB	Clickable links

2.2 Typography

Usage	Font	Weight	Notes
Primary (Web)	Plus Jakarta Sans	200–800	All headings and body text
Secondary (Web)	Inter, DM Sans	400–700	Alternative body text
Primary (Mobile)	System sans-serif	All	Material Design 3 type scale
All text	—	—	Legible at small mobile sizes, clean and modern

2.3 Icons & Imagery

- **Web icons:** Lucide React (outlined, consistent) + Font Awesome 6.5
- **Mobile icons:** Material Design 3, vector drawables
- **Food photography:** Bright, high-contrast, appetizing — no dark moody shots
- **Driver imagery:** Dynamic, movement-focused
- **UI style:** Glass morphism effects, orange gradients, rounded corners (24dp cards)
- **Animations:** Float animations, shimmer loading states, pulse effects

2.4 Overall UI Tone

- **Clean and premium** — orange feels warm, energetic, not cheap
- **Glass morphism** effects for depth and modernity
- **Dark mode** support on web and mobile (toggle-based)
- **Mobile-first** responsive design (sm / md / lg breakpoints)
- **Material Design 3** on Android with custom orange theme
- **Minimal clutter** — only what's needed on each screen

- **Fast and energetic** — users should feel like things are moving
-

3. User Types & Apps

ZimFeast has five separate interfaces — each optimized for its user:

3.1 Customer App (Android)

The main consumer-facing mobile app. Used to browse restaurants, order food, pay via mobile money, and track delivery in real time.

- 15 screens
- Biometric authentication (fingerprint / face)
- Offline cart and address persistence
- Real-time order tracking with live driver location
- Google Maps integration for address selection
- Paynow payment gateway (EcoCash, OneMoney, InnBucks)

3.2 Customer Web App (Browser)

Web-based customer experience accessible from any browser, with same features as mobile plus:

- AI-powered "Chef Zim" food recommendations
- Banner carousel for promotions
- Referral system with sharing
- WhatsApp support integration
- Dark mode toggle

3.3 Driver App (Android)

Used by delivery drivers to receive job notifications, navigate to pickup and drop-off, and track earnings.

- 4 main screens + background location service
- Real-time delivery offers with countdown timer
- In-app turn-by-turn navigation (Google Directions)
- Proof of delivery photo upload
- Daily earnings, tips, and rating summary
- Online/offline toggle with adaptive location tracking

3.4 Restaurant Dashboard (Web)

Web-based dashboard for restaurant staff to receive orders, manage menus, and track finance. Also usable on a tablet mounted in the kitchen.

- Tabbed interface: Dashboard, Menu, Finance, Settings
- Real-time order notifications with sound alerts and visual flash
- Mute toggle for sound alerts (persisted)
- Receipt printing
- Prep timer countdown per order
- Menu item management with image upload
- External API integration for chain restaurants

3.5 Admin Panel (Web)

Full platform management for ZimFeast operations team.

- 13+ dedicated management pages with sidebar navigation
- Real-time analytics with interactive charts
- User, restaurant, driver, and order management
- Financial analytics and settlement tracking
- Promotional banner and promo code management
- Driver approval workflow
- Data export (CSV / Excel)

4. Customer App — Screen Specifications

4.1 Onboarding & Authentication

Screen	Key Elements	Notes
Splash Screen	ZimFest logo centered, authentication check, biometric prompt	Auto-routes to Landing or Home based on login state
Landing Screen	Auto-scrolling cuisine carousel (10 cuisine types), curated restaurant showcase (5 featured), feature highlights (Speed, Security, Premium Selection), "Get Started" + "Login" buttons	Shown when logged out
Sign Up	First name, last name, email, phone number, password, role selector (Customer / Restaurant / Driver), optional referral code field	Biometric setup prompt after successful registration
Login	Email + password	Biometric login available on return visits
Location Permission	System prompt for location access	Required for delivery fee calculation and nearby restaurant sorting

4.2 Home Screen

Element	Details	Notes
Navigation Drawer	User info (name, email), Orders, Favorites, Referrals, Help, Settings, Logout	Slide-out side menu
Cuisine Filters	Horizontal scrollable row: All, Fast Food, Traditional, Breakfast, Pizza, Chinese, Indian, Lunch Pack	Filters restaurant list by cuisine type
All Restaurants	Grid layout (2 columns), paginated, searchable by name	Shows: image, name, rating stars, cuisine tags, distance
Top Rated Section	Horizontal scroll cards, restaurants with rating >= 4.5	Premium showcase
Nearby Section	Horizontal scroll, sorted by distance from user	Requires location permission
Chef Zim AI Card	Promotional card for AI food recommendations	Opens AI recommendation dialog

Cart Badge	Floating button showing item count	Persistent across screens
------------	------------------------------------	---------------------------

4.3 Restaurant / Menu Screen

Element	Details	Notes
Restaurant Header	Cover image, restaurant name, cuisine type, star rating, estimated delivery time	Full-width hero section
Menu Items	Vertical scrollable list: item name, description, price, image thumbnail, "Add to Cart" button	Grouped by category
Cart Button	Floating badge showing total items currently in cart	Anchored at bottom of screen

4.4 Cart & Checkout

Screen	Key Elements	Notes
Cart Screen	Items list with quantity controls (increase / decrease / remove), order type toggle (Delivery vs Pickup), delivery address entry (manual, Google Places autocomplete, or saved addresses), delivery fee calculation (distance-based), tip input field, schedule order button (date + time picker for future orders)	Cart persists across app sessions
Checkout Screen	Order summary (items, subtotal, delivery fee, tip, total), payment method selection (PayNow Web / PayNow Mobile / Voucher), promo code entry and validation, referral credit usage option (15% discount), voucher balance display	Supports combined voucher + Paynow payment
PayNow Payment	Embedded payment page supporting EcoCash, OneMoney, InnBucks mobile money providers	Handles completion and cancellation
Order Placed	Animated confirmation with order number, redirects to tracking screen	Success state

4.5 Live Order Tracking

Element	Details	Notes
Live Map	Google Map with 3 markers: Green (restaurant), Red (delivery address), Blue (driver — live position)	Real-time position updates
Route Line	Visual path drawn from restaurant to delivery address	Google Maps route
Status Timeline	Visual steps: Confirmed → Preparing → Out for Delivery → Delivered	Progress indicator with active/completed states
Driver Info Card	Driver name, phone number, vehicle details	Shown once driver is assigned

ETA Display	Estimated minutes remaining + distance in km	Updates automatically as driver moves
Call Driver	Direct phone dial button	One-tap calling
Rating Dialog	Auto-appears on delivery completion — rate restaurant (1–5 stars + comment) and driver (1–5 stars + comment) separately	Encourages feedback

4.6 Orders & Profile

Screen	Key Elements	Notes
Order History	List of all past orders: status badge, date, restaurant name, total amount	Tap to view full tracking details
Address Book	Saved delivery addresses with label (Home, Work, etc.), full text, map coordinates	Add, edit, delete addresses
Address Picker	Google Places autocomplete (bounded to Zimbabwe), interactive map with draggable pin, reverse geocoding, "Use Current Location" button	Returns selected address to Cart
Referral Screen	Unique referral code (ZF-XXXXXX), shareable link, list of available and used referral credits, discount percentage	Share via any messaging app
Settings	Biometric login enable/disable, WhatsApp support button (opens chat with +263 78 160 3382)	Security and help

5. Driver App — Screen Specifications

5.1 Authentication & Onboarding

Screen	Key Elements	Notes
Login	Email + password, validates driver role	Routes to home screen on success
Profile Setup	License number, vehicle details (make, model, plate number, color), ID photo upload, vehicle photo upload	Submitted for admin review — driver cannot go online until approved

5.2 Home Screen

Element	Details	Notes
Delivery Offers Section	Real-time incoming delivery offers. Each offer shows: restaurant name and address, drop-off address, distances (to restaurant, to customer, total route), earnings breakdown (delivery fee + tip), countdown timer. Accept / Reject buttons	30-second timer per offer — auto-declines if no response
Accepted Deliveries	Horizontal scrollable cards of currently active deliveries with status progression	Quick navigation to active delivery screen
Daily Finance Card	Today's deliveries count, total earnings (\$), tips collected (\$), hours online, average rating (stars)	At-a-glance daily performance

Online / Offline Toggle	Large prominent toggle button	Going online starts background location tracking; going offline stops it
Location Service Indicator	Shows whether background location tracking is active	Visual confirmation for driver

5.3 Active Delivery Screen

The core delivery execution screen. Guides the driver through a 5-phase delivery process:

Phase	Status Display	Action Button	Notes
Phase 1	"Navigate to Restaurant"	"Arrived at Restaurant"	Driver heading to pick up the order
Phase 2	"At Restaurant — Wait for Pickup"	"Picked Up Order"	Driver is at restaurant, waiting for food
Phase 3	"Order Picked Up — Heading to Customer"	"Arrived at Destination"	Driver en route to customer
Phase 4	"At Destination — Deliver to Customer"	"Complete Delivery"	Triggers proof of delivery photo prompt
Phase 5	"Delivery Complete!"	Done (auto-returns to home after 2 seconds)	Delivery finished

Element	Details	Notes
Embedded Map	Full Google Map with driver's live position, route polyline to destination, destination marker (green for pickup, red for drop-off)	In-app turn-by-turn navigation with Google Directions
ETA / Distance Overlay	Real-time estimated arrival time and distance remaining	Updates as driver moves
Re-center Button	Re-fits map to show full route between driver and destination	Floating button on map
Pickup & Drop-off Info	Step indicator showing restaurant name (pickup) and delivery address (drop-off)	Visual progress bar
Customer Info Card	Customer name with one-tap call button	Direct phone dial
Earnings Display	Delivery fee and tip amount for this order	Green accent card
Navigate Button	Opens external Google Maps for full turn-by-turn if needed	Fallback option

Proof of Delivery	Camera prompt when completing final delivery step — photo uploaded as delivery proof	Optional — driver can skip
-------------------	--	----------------------------

5.4 Background Services

Service	Behavior	Notes
Location Tracking	Runs continuously while driver is online. Adaptive intervals: every 10 seconds during active delivery, every 60 seconds when idle/waiting for orders	Foreground service with persistent notification
Delivery Notifications	Push-style notifications for new delivery offers when app is backgrounded	Brings driver's attention to new jobs

5.5 Earnings & History

Screen	Key Elements	Notes
Daily Finance	Deliveries completed, total earnings, tips, hours online, average rating — displayed on home screen	Per-day summary
Order History	List of completed deliveries with date, restaurant, customer area, earnings, status	Scrollable with pagination

6. Restaurant Dashboard — Screen Specifications

Web-based dashboard, also usable on a tablet mounted in the kitchen or front of house.

6.1 Authentication

- Restaurant owner/staff logs in via web
- Automatic redirect to dashboard if already authenticated

6.2 Dashboard Layout

- **Header:** Restaurant name display + Open/Closed toggle switch (controls whether restaurant appears to customers)
- **Tabbed Interface:** Four main tabs — Dashboard, Menu, Finance, Settings

6.3 Dashboard Tab (Live Orders)

Stats Cards (top of dashboard):

Metric	Display
Today's Orders	Count
Today's Revenue	USD amount
Average Rating	Star rating
Menu Items	Total count
Average Order Value	USD amount

Live Orders Panel:

Feature	Details	Notes
Real-time Order List	Orders appear instantly as they are placed	WebSocket-powered live updates
Sound Alerts	Ascending chime plays when new order arrives	Pleasant 3-note tone (C5 → E5 → G5)
Visual Flash	New order card flashes amber 3 times (0.67s each), glowing border	Draws attention to new orders
Mute Toggle	Button to mute/unmute sound alerts	Preference saved across sessions
Status Filters	Filter tabs: All, Pending, Preparing, Ready — each showing count	Quick status overview
Order Cards	Order ID, items list with quantities, total amount, status badge, timestamp, delivery/collection method indicator	Full order info at a glance
Action Buttons	"Start Preparing" → "Mark Ready" → "Mark Collected" (collection) / "Awaiting Delivery" (delivery)	Sequential status progression
Prep Timer	Countdown timer showing elapsed preparation time per order	Visible on orders being prepared
Print Receipt	Print button per order	Opens browser print dialog
Pagination	Previous / Next buttons (10 orders per page)	Navigate through order history
Highlighted Orders	Newly arrived orders get 5-second orange highlight animation	Visual priority for new orders

6.4 Menu Management Tab

Feature	Details	Notes
Menu Table	All items displayed: name, price, availability toggle, prep time, category	Full inventory view
Add New Item	Dialog form: item name, description, price, category, prep time, image upload	Supports photo upload
Edit Item	Modify any field of existing menu items	Inline or dialog editing
Delete Item	Remove item with confirmation dialog	Prevents accidental deletion
Availability Toggle	Quick on/off switch per item (e.g. "Sold Out" for the day)	Instant visibility control

Category Management	Create and assign food categories to items	Organize menu structure
---------------------	--	-------------------------

6.5 Finance Tab

Feature	Details	Notes
Today's Revenue	Revenue and order count for current day	Daily snapshot
Trend Charts	Weekly and monthly revenue trend lines	Visual performance tracking
Top Items	Best-performing menu items by sales	Identify popular dishes
Payment Breakdown	Pie chart showing payment methods used by customers	Revenue source analysis
Earnings History	Per-order earnings with platform fee deductions	Detailed financial log
Outstanding Amounts	Unsettled balances for direct-payment restaurants	Track what's owed

6.6 Settings Tab

Feature	Details	Notes
Restaurant Info	Name, description, cover image upload	Brand presentation
Cuisine Types	Select applicable cuisine categories	Helps customer discovery
Minimum Order	Set minimum order value for delivery	Business rule
Opening Hours	Configure daily operating hours (supports 24h and overnight schedules)	Controls when restaurant is visible
Location	Restaurant address and map pin	Delivery distance calculations
Open/Closed Override	Manual toggle to go offline regardless of schedule	Emergency or ad-hoc closure

6.7 External API Integration

Feature	Details	Notes
Menu API Endpoint	Register external menu management system URL	For chain restaurants with central menus
Order Webhook	Configure URL to receive order notifications externally	Third-party integration
API Key Management	Securely store and manage integration credentials	Encrypted storage

7. Admin Panel — Screen Specifications

For internal use by ZimFeast management team. Web-based, accessible at /admin.

7.1 Navigation

Collapsible sidebar with organized sections:

- **Main:** Dashboard, Orders, Finance
- **Management:** Users, Restaurants, Drivers, Pending Driver Approvals
- **Marketing:** Banners, Corporate Accounts, Promo Codes
- **System:** Reviews, System Health, Settings

7.2 Admin Dashboard

Element	Details	Notes
Live Order Stats	Active orders by status (pie chart), orders placed in last hour, average delivery time	Real-time monitoring
Stuck Orders Alert	Flags orders that have been pending longer than expected	Actionable warning for ops team
Revenue Trend	Daily revenue chart (last 30 days)	Visual trend line
Status Breakdown	Orders by status (bar chart)	Distribution overview
Top Restaurants	Table ranking restaurants by order count and revenue	Performance leaderboard
Recent Orders	Last 20 orders with status badges	Quick activity feed
User Counts	Total customers, restaurants, drivers, admins	Platform size at a glance

7.3 Orders Management

Element	Details	Notes
Search	Search by order ID	Instant filtering
Status Filter	Filter orders by status (all statuses available)	Dropdown selector
Orders Table	Order ID, restaurant name, customer, status badge, total fee, created date	Sortable columns
Pagination	10 / 25 / 50 orders per page	Configurable page size
Order Detail	Click to view: full item breakdown, customer info, driver info, payment details, status timeline	Complete order audit
Status Override	Admin can force-change any order's status	Emergency intervention
Export	Download filtered orders as CSV or Excel	Reporting and analysis

7.4 User Management

Element	Details	Notes
Role Filter	Filter by: Customer, Restaurant, Driver, Admin	Tab or dropdown
Search	Search by email or name	Instant filter
Users Table	Email, name, role badge, active/suspended status, join date	Paginated list
Suspend User	Dialog to suspend account with reason field	Toggles user access
Promote to Admin	Elevate user role to admin	With confirmation
Export	Download filtered users as CSV or Excel	CRM reporting

7.5 Restaurant Management

Element	Details	Notes
Search	Search by restaurant name	Instant filter
Restaurant Table	Name, owner, open/closed status, average rating, reviews count, created date	Sortable columns
Suspend / Unsuspend	Toggle restaurant active status	With confirmation dialog
Detail View	Full restaurant profile, menu items, order history, earnings	Complete restaurant audit

7.6 Driver Management

Element	Details	Notes
Search	Search drivers by name	Instant filter
Drivers Table	Name, phone, star rating, total deliveries, vehicle details	Sortable columns
Online Status	Real-time online/offline indicator	Color-coded badge
Detail View	Full driver profile, delivery history, ratings, earnings	Complete driver audit

7.7 Pending Driver Approvals

Element	Details	Notes
Pending Queue	Drivers awaiting approval: name, license info, vehicle details, submission date	Queue view
Approve	One-click approval — driver can immediately go online	Instant activation
Reject	Reject with written reason/notes sent to driver	Feedback for resubmission

7.8 Financial Analytics

Element	Details	Notes
Revenue Summary	Total revenue, this month, this week, today	KPI cards
Revenue by Payment Method	Pie chart (Paynow / Voucher / Direct)	Payment mix analysis
Daily Revenue Trend	Bar and area chart (30 days)	Visual trend
Top Restaurants by Revenue	Ranked table	Revenue leaders
Failed Payments	List of failed payment transactions	Troubleshooting
Settlements	Track payment settlements to restaurants	Outstanding balance tracking
Refund Processing	Admin can process customer refunds	Manual override capability

7.9 Promotional Management

Page	Key Elements	Notes
Banners	Create/edit promotional banners: campaign type (free delivery, discount, info, new restaurant), targeting (all users / new users / returning users), scheduling (start/end dates), priority ranking, image upload	Displayed in customer app carousel
Promo Codes	Create discount codes: percentage or fixed amount, minimum order value, maximum uses, expiry date, active/inactive toggle	Applied at checkout by customers
Corporate Accounts	Manage corporate client accounts: company name, employee lists, per-employee spending limits, department budgets	B2B client management

7.10 System & Reviews

Page	Key Elements	Notes
Reviews	All customer reviews feed with restaurant and driver ratings	Content moderation capability
System Health	Service status monitoring, performance indicators	Operational oversight
Platform Settings	Platform-wide fee configuration, delivery zone management, app behavior settings	Global configuration

8. Platform Capabilities

8.1 Payment Methods

Method	Description	Notes
Paynow (Web)	Customer redirected to Paynow payment page	EcoCash, OneMoney, InnBucks

Paynow (Mobile)	USSD push notification sent to customer's phone	Requires phone number and provider selection
FeastVoucher	Deduction from built-in e-wallet balance	Instant — no external gateway needed
Voucher + Paynow	Partial voucher deduction + Paynow for remainder	Hybrid split payment
Direct Restaurant Payment	Customer pays restaurant's own Paynow account	Platform commission still applied

8.2 Order Flow

Customer places order → Payment processed → Restaurant notified (sound + visual alert)
→ Restaurant starts preparing → Order marked ready → Driver assigned
→ Driver picks up order → Driver navigates to customer (live tracking)
→ Driver delivers + takes proof photo → Order completed → Rating prompt shown

8.3 Order Statuses

Pending Payment → Paid → Preparing → Ready → Collected → Assigned → Out for Delivery → Delivered

Additional states: Scheduled (for future orders), Cancelled.

8.4 Delivery Fee

- Rate: \$0.35 per kilometer (straight-line distance)
- Minimum fee: \$1.50
- Delivery must be within Zimbabwe

8.5 Referral Program

- Each user gets a unique referral code (format: ZF-XXXXXX)
- New user registers with referral code → tracked
- After referred user places a qualifying order (\$20+), referrer earns a 15% discount credit
- Credits are single-use, applied at checkout

8.6 Promo Codes

- Admin creates discount codes with: percentage or fixed discount, minimum order amount, maximum usage count, expiry date
- Customers enter code at checkout — validated and applied automatically
- One use per customer per promo code

8.7 FeastVoucher E-Wallet

- Built-in digital wallet per user
- Can be topped up via Paynow deposit
- Used for instant checkout (no external redirect)
- Can be combined with Paynow if balance is insufficient (auto top-up flow)

8.8 Scheduled Orders

- Customers can select a future date and time for delivery

- Order is held in "Scheduled" status
- System automatically transitions order to active when scheduled time arrives
- Restaurant receives notification at the appropriate time

8.9 Corporate Accounts

- Companies register a corporate account
- Corporate admin adds employees by email
- Per-employee spending limits configurable
- Account-level total spending cap
- Employees can order using corporate billing

8.10 Real-Time Features

Feature	Description
Live Order Tracking	Customers see driver's position on map updating in real time
Restaurant Order Alerts	New orders appear instantly with sound chime and visual flash
Driver Delivery Offers	Drivers receive delivery job offers in real time with countdown
ETA Updates	Estimated arrival time and distance update as driver moves
Driver Location Broadcast	Driver's GPS position shared with customer during delivery

8.11 Performance Targets

Metric	Target
App Load Time	Under 3 seconds on 4G
Order-to-Kitchen Notification	Under 10 seconds
Live Tracking Update	Every 10 seconds (active delivery)
Driver Location (Idle)	Every 60 seconds
Minimum Android Version	Android 7.0 (API 24)
Offline Handling	Graceful degradation — offline banner, cached cart and addresses

8.12 Security Highlights

Feature	Description
Encrypted Token Storage	Authentication tokens encrypted on device (AES-256)
Biometric Authentication	Fingerprint / face login on customer app (optional)
Secure Payments	All payment data handled by Paynow gateway — never stored on device
Rate Limiting	Protection against brute-force attacks on login
Web Application Firewall	Protection against common web attacks and abusive traffic
HTTPS Only	All communication encrypted in transit

Driver GPS Privacy	Location tracking only active when driver is online
--------------------	---

9. Deliverables & Implementation Status

9.1 What Is Built (MVP Complete)

Deliverable	Status
Customer Android App (15 screens)	✔ Complete
Driver Android App (4 screens + background services)	✔ Complete
Customer Web App	✔ Complete
Restaurant Dashboard (Web)	✔ Complete
Admin Panel (Web, 13+ pages)	✔ Complete
Corporate Dashboard (Web)	✔ Complete
Paynow Payment Integration (EcoCash, OneMoney, InnBucks)	✔ Complete
FeastVoucher E-Wallet	✔ Complete
Google Maps Integration (Places, Directions, Geocoding)	✔ Complete
Real-Time Order Tracking (live driver location)	✔ Complete
In-App Driver Navigation (turn-by-turn directions)	✔ Complete
Sound Alerts for Restaurant Orders	✔ Complete
WhatsApp Support Integration	✔ Complete
Biometric Authentication (Customer App)	✔ Complete
Referral Program (ZF-XXXXXX codes, 15% credit)	✔ Complete
Promo Code System (percentage / fixed discounts)	✔ Complete
Scheduled Orders (future date/time delivery)	✔ Complete
Corporate Accounts (multi-employee, spending limits)	✔ Complete
Driver Approval Workflow (admin approve/reject)	✔ Complete
Proof of Delivery Photos	✔ Complete
Restaurant Finance Tracking (earnings, commissions, debts)	✔ Complete
Receipt Printing (Restaurant Dashboard)	✔ Complete
Admin Data Export (CSV / Excel)	✔ Complete
Promotional Banner System (campaigns, targeting, scheduling)	✔ Complete
Chef Zim AI Food Recommendations (Web)	✔ Complete

Dark Mode (Web)	✔ Complete
External Restaurant API Integration	✔ Complete
Cloud Infrastructure (AWS)	✔ Complete
CI/CD Deployment Pipeline	✔ Complete
Docker Containerization	✔ Complete

9.2 Phase 2 Roadmap

Feature	Priority
iOS Customer App	High
iOS Driver App	High
SMS OTP Verification	High
Push Notifications (Firebase)	High
Loyalty / Rewards Program	Medium
Multi-Language Support (Shona, Ndebele)	Medium
ZiG Currency Dual Display	Medium
Advanced Analytics (customer behavior, heatmaps)	Medium
Customer Favorites / Saved Restaurants	Low
Group Orders (shared cart)	Low
In-App Driver Chat	Low

10. Timeline & Priorities

Phase	Scope	Status
Phase 1 (MVP)	Customer App + Driver App + Web Apps + Restaurant Dashboard + Admin Panel + Payments + Tracking + Cloud Infrastructure + CI/CD	✔ Complete
Phase 2	iOS apps, SMS OTP, push notifications, loyalty program, ZiG currency	Q2 2026
Phase 3	Multi-language, advanced analytics, group orders, driver chat	Q3 2026

Priority	Detail
Primary Device	Android first (majority of Zimbabwe smartphone users)
Internet Conditions	Optimized for standard Zimbabwean mobile data (Econet, NetOne, Telecel)
Language	English only (MVP)

Currency	USD primary, ZiG dual display planned for Phase 2
----------	---
